## **Tuesday is last day to register for the Steve Hinds Workshop**

*This email was sent to all program directors and lead instructors.*

***"I loved all the scaffolded instruction. Students were able to understand the concept before the official terminology or formula was discussed."***

***"More than anything, I appreciated being in a training that modeled really good teaching strategies for me... I was a student of someone teaching effectively and demonstrating quality teaching techniques. It was really refreshing. I don't think I yawned once!"***

***"It was fantastic! Steve Hinds is great and I look forward to other trainings he gives."***

The opportunity for any KYAE math instructor to spend a day working with Steve Hinds only comes once a year. These quotes from last year's participants testify to the quality of the presentation. **Don't miss out!**

Registration for the Steve Hinds *Strengthening Adult Numeracy Teaching and Learning* **closes at end of day Tuesday, August 12<sup>th</sup>**. This one-day workshop is an opportunity for math instructors to experience first-hand how to teach students to use critical thinking skills to arrive at deep conceptual mathematical understandings. Using his *Functions Rule* unit, Steve will lead participants through seven sequenced lesson activities. Participants leave with this *Functions Rule* curriculum and a better understanding of how to teach students to succeed on the math section of the 2014 GED® Test.

To enroll in either the Lexington or Louisville 9:00 - 4:00 ET workshops, go to KYAE 130 in the [PD Catalog](http://www.kyvae.org/courses/courses.aspx) (<http://www.kyvae.org/courses/courses.aspx>).

If you have any questions, please contact **Gayle Box**, Senior Associate, Strategic Initiatives at or [gayle.box@ky.gov](mailto:gayle.box@ky.gov).
